

## **Write a function to convert a 12 Hour clock to 24 Hour clock**

```
static String timeConversion(String s) {  
    if(s.charAt(s.length() - 2) == 'A') {  
        int hour = Integer.parseInt(s.substring(0,2));  
        if(hour == 12) return "00" + s.substring(2, s.length() - 2);  
        else return s.substring(0, s.length() - 2);  
    }  
    else{  
        int hour = Integer.parseInt(s.substring(0,2));  
        if(hour == 12) return s.substring(0, s.length() - 2);  
        return "" + (hour + 12) + s.substring(2, s.length() - 2);  
    }  
}
```
